1. Excellence Through Technology

PROJECT DESCRIPTION

Funding is requested for additional support to enhance technological capabilities and information dissemination across the state.

Technology is not changing what students learn, but how they learn. Computer-based instruction and distance learning technologies have changed the way higher education institutions deliver their educational programs. The goal at Delaware Tech is to maximize the use of these technologies to increase accessibility by enhancing and providing alternatives to the traditional classroom setting.

Meeting the challenge of technology is a commitment the college shares with both the public and private sectors. Financial support provided by this Public/Private Partnership will allow Delaware Tech to heighten its efforts to prepare students to become more valued and versatile employees by harnessing the power of technology on all campuses throughout the state.

Funding from both the public and private sectors has enabled the college to establish teaching resource centers and campus technology infrastructures to support all instructional delivery modes.

2. Stanton Campus Expansion

PROJECT DESCRIPTION

Funding is requested for the renovation and expansion of the Stanton Campus and to construct a Health Sciences facility. An architect has begun the programming phase

3. Collegewide Asset Preservation/MCI

PROJECT DESCRIPTION

Funding is requested for asset preservation. The college has been operating for over 38 years. During this time, the square footage of its facilities has grown to over 1.3 million square feet on 276 acres throughout the state. Given the aging of certain college facilities and the need for retrofitting other buildings to accommodate the increased uses of technology, the college plans to reinvest additional funds in its capital infrastructure. Maintaining and preserving its capital investments will result in long-term cost savings to the state.

4. Campus Improvements - Owens Campus

PROJECT DESCRIPTION

Funding is requested for campus improvements which include the replacement of the heating, ventilation and air conditioning (HVAC) infrastructure in the Arts and Science Building and campus library. This project will include electric and sprinkler modifications, new ceilings

and lighting, replacement of the duct system, new automatic temperature controls and new air handling units. The Arts and Science Building is 32 years old and the library is 23 years old and neither has had a major upgrade. Temperature variations and noisy air handling systems have made it difficult to teach in the buildings. The outdated HVAC equipment and sprinkler system have caused health and safety concerns. Improvements will also save energy.

5. Campus Improvements - Terry Campus

PROJECT DESCRIPTION

Funding is requested to complete the campus master plan which consists of the following components:

- Construct campus pedestrian mall areas between buildings, install campus exterior signage and upgrade entrance to the campus;
- Resurface major parking lots;
- Remove old asphalt sidewalks and install new sidewalks and sidewalk lighting;
- Retrofit parking lot area lighting;
- Purchase and demolish private homes on south side of Denney's Road adjacent to campus property; and
- Landscape campus areas currently not landscaped in accordance with campus master plan.

6. Stanton/Wilmington Renovations

PROJECT DESCRIPTION

Funding is requested for safety, maintenance and building renovations that are associated with aging facilities. Many of the facilities at Stanton/Wilmington campuses are over 30 years old. The square footage has grown to 217,000 at Stanton and 446,322 at Wilmington. Given the aging of the building infrastructure and the need for retrofitting older buildings to accommodate the increased uses of technology, the campus requires funding to maintain and modernize its facilities to remain on the cutting edge.
